

# SOA Puzzle 68 - Solution

## Maze Town

Your aim is to navigate through the town from the start to the finish. At each junction you can only run in the direction of the arrows. This means that you can only turn if there is a curved line in that direction and in the direction of the arrow head. You can only navigate straight through the junction if there is a straight line.

For example at the 1<sup>st</sup> and 2<sup>nd</sup> junctions, you can only go straight ahead but at the 3<sup>rd</sup> junction you could go straight or turn north.
